Derived from Potassium Acetate

HOW IT WORKS

MicroEdge® K is a highly efficient, chloride-free liquid formulation for soil and foliar applications. It offers significantly faster plant absorption when applied foliar.

MicroEdge K increases grain fill, improves stress tolerance, and optimizes yield by delivering a highly mobile form of potassium when plants need it the most.

PRODUCT BENEFITS

NUTRIENT AVAILABILITY

- Provides superior absorption compared to other potassium sources, ensuring rapid plant response
- Suitable for foliar or soil-applied applications

CROP HEALTH

- Potassium promotes plant development, root growth, and helps resist heat and drought
- Low salt formulation minimizes the risk of leaf burn

EASE OF USE

- MicroEdge K is compatible with most fertilizers, insecticides, fungicides, and herbicides for easy tank mix applications
- Can be applied at any growing stage, providing multiple in-season benefits that result in higher yield potential

**HIGHLY AVAILABLE
POTASSIUM FOR
STRONGER CROPS AND
GREATER YIELDS**

CROPS

Corn, Soybeans, Wheat and
Cereal Grains, Alfalfa, Hay
& Forages

TIMING

In-furrow, banded &
foliar applications

USE RATE

1-8 quarts/acre

Can be used alone or in tank
mixtures. Please refer to
the tank mix product label
for application timing and
restrictions.
